Keyword three
Historical data
Empirical analysis

ABSTRACT

This draft is a placeholder for a new paper built from the Sources of Capital Growth project structure. The empirical pipeline, figure generation, regression outputs, and table generation remain active while the narrative is rewritten for the new topic. The current draft keeps the paper shell and display outputs in place so new text, framing, and additional figures can be added incrementally.

Table 1
Baseline regression output for the current draft sample, GDP-weighted. Screen = 0.01.

Regression of s^* on $g(K)$	0.0671^{***}	Regression of Δs^* on $\Delta g(K)$	0.0424^{***}
	(0.0140)		(0.0074)
Observations	2,419	Observations	2,084
R^2	0.81576	R^2	0.66471
Within R^2	0.11450	Within R^2	0.25562
Year fixed effects	✓	Year fixed effects	✓
Country fixed effects	✓	Country fixed effects	✓

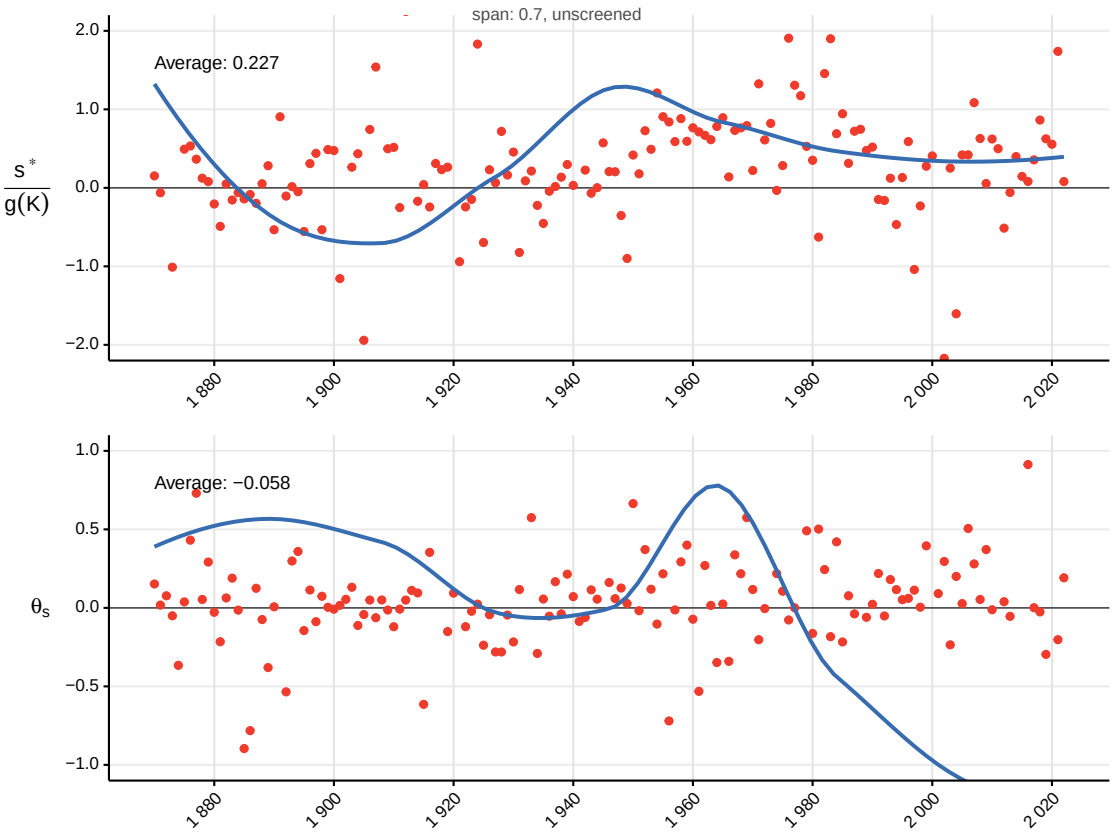

Fig. 1: Dot-chart history for $\frac{s^*}{g(K)}$ and θ_s in the current sample, with LOESS smoothing over yearly GDP-weighted means, 1870–2022.

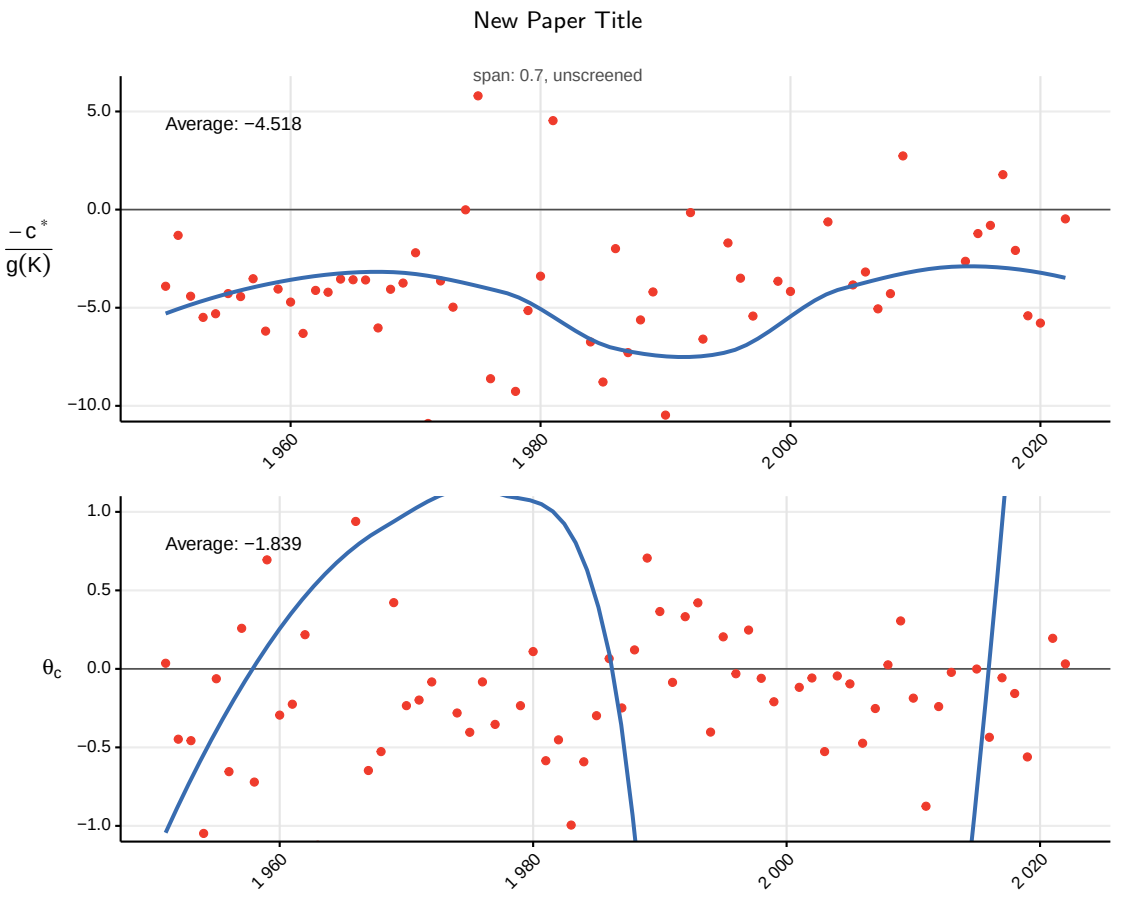

Fig. 2: Dot-chart history for $\frac{-c^*}{g(K)}$ and θ_c in the current sample, with LOESS smoothing over yearly GDP-weighted means, 1870–2022.

Data usage note. Table 2 uses the raw cleaned WID file and is not screened. The plotted series use the analysis sample in `scg_data.csv`, which keeps observations with non-missing capital and at least one of savings or consumption, but the plots themselves are currently unscreened. All figures now use the same plotted object: yearly GDP-weighted means, with LOESS fit to those yearly means. Table 3 applies the ratio screen $|g(K)| > 0.01$, while Table 4 applies the change-based screen $|\Delta g(K)| > 0.01$. Thus the paper now uses three distinct objects: raw cleaned coverage for Table 2, the unscreened analysis sample for the figures, and the screened analysis sample for Tables 3 and 4.

Table 2
Coverage of the underlying series for France, Germany, the United Kingdom, and the USA in the raw cleaned WID file before the analysis-sample filter. This table is not screened. Each entry reports first year, last year, and number of non-missing observations.

Country	Consumption	Savings	Capital	GDP
USA	1970 - 2022 (53)	1970 - 2022 (53)	1800 - 2024 (225)	1800 - 2024 (225)
United Kingdom	1970 - 2022 (53)	1920 - 2022 (96)	1800 - 2024 (225)	1800 - 2024 (225)
France	1950 - 2022 (73)	1896 - 2022 (127)	1800 - 2024 (225)	1800 - 2024 (225)
Germany	1970 - 2022 (53)	1950 - 2022 (73)	1800 - 2024 (225)	1800 - 2024 (225)

Table 3
Country-level summary of $\frac{s^*}{g(K)}$ in the current draft sample. Screen = 0.01. Period reports unscreened country coverage in the analysis file; number of years clearing screen shown in ()

Armenia	1991 - 2021 (27)	0.02	Italy	1971 - 2022 (37)	0.15
